

LAYERS OF PROTECTION

QB2 with BoltSeal® Technology

Patent #8448407

SOLARINSURE PREFERRED MOUNTING SUPPLIER

On top of our 25-year manufacturer warranty, extend your coverage through SolarInsure's 30-year parts and labor warranty.

CHEMICAL SEALANT

Thanks to our BoltSeal® tech, QB2 is the strongest QuickBOLT yet, and it works without sealant. If you still use goop, your install will benefit from the additional layer of protection.

MICROFLASHING®

Our innovative Microflashing® is placed over the predrilled hole to flash the penetration, achieved by torque-driven compression.

L-FOOT

Place the L-Foot over the Microflashing® and secure it with the shoulder screw. This increases the surface area being compressed and improves the BoltSeal®.

THE SCREW

When properly driven into the rafter, the custom shoulder screw compresses the Microflashing® into the roof. If you miss the rafter, you'll know right away!
